# The Arbonne **History**

Arbonne is a place where ordinary people do extraordinary things every day to enhance not only their own lives, but also the lives of so many others.

Arbonne's story began with my father, Petter Mørck, who started this company more than 30 years ago. His passion for the beauty and perfection found only in nature led him to develop botanically based products around the philosophy of pure, safe and beneficial. The name Arbonne comes from a village in Switzerland, which has come to mean beautiful tree. This is a metaphor for all things Arbonne — natural and enduring, providing shelter and abundance, always green and always growing. Just like my father, I am passionate about the dream that has made Arbonne the unique company it is today. His vision was all about quality — the products, the people and their quality of life. Arbonne opens people's eyes to not only what they can do, but what they can be. One of my father's greatest joys in life was people, and anyone who knew him could tell you that he always treated Independent Consultants like family. His caring nature quickly became, and continues to be, an important part of the vibrant Arbonne culture — allowing us to help transform lives, give back, and leave the earth better than we found it for future generations. Wanting to grow stronger and be better, that's part of our legacy too. And it's not just our past — it's shining a light on our future.

Stian Mørck, Managing Director

Standing on a simple farm dressed in Story of Petter humble clothing, the boy's eyes reflected a worldly curiosity and a hunger for experience. The gray backdrop was the perfect contrast to where life would take him. At fourteen, he left home to seek his fortune. To make his mark. A sailor on a merchant ship's crew, he spent years sailing the world, from New York to Australia forends on and everywhere between He returned home a man. Swelltraveled, selfeducated, charming risk taker, ready to transform the world. Always seeking knowledge and refusing to be distracted by anything secondary, he had the rareability to recognize quality - in things, in people, and in business. The world's best became his standard, and he kept true to that philosophy when he began his life's biggest adventure. From the moment of conception, Arbonne would bring only the highest quality ingredients and most premium products to the rest of the world. One idea became a legacy. One moment became endless opportunity.

## From the field to You

Humans and nature have always had an intrinsic connection. Plants and flowers provide us with energy, vitality and life in so many incredible ways. We are drawn to nature. It nourishes our souls and our sense of well-being.

This dynamic bond between humans and nature is the essence of Arbonne. Our botanically based products utilize the best of what nature has to offer to improve our lives. We look to nature for products that make us feel healthier, revitalized and more beautiful.

From a field, a farm, or even the ocean, we gently harvest nature's gifts. We carefully source them from all over the world — Europe, Asia, the United States — always with sustainability in our hearts and minds.

In the capable hands of our product development team, these beneficial ingredients are given a new life as an integral piece of an Arbonne product formula. Guided by the principles of green chemistry, our talented scientists — under the direction of Dr. Peter Matravers, Arbonne Chief Scientific Officer, and Jennifer Chang, Director of R&D — bring product concept to reality at the Arbonne Research and Development Laboratories.

This state-of-the-art facility in Irvine, California, is where Arbonne scientists create product prototypes, and test formulas for stability and efficacy. It's where the magic happens.

The end result is a world-class product crafted with integrity, expertise and innovation.

Created especially for you.

From the fields of nature to you. Enjoy and be well.

# A message from the **CEO**

I joined Arbonne because I believed in the brand promise of "pure, safe and beneficial," and in our incredible products that transform lives. The amazing surprise I found was the uniqueness and talent of our outstanding Independent Consultant Leaders - thousands who live and breathe the Arbonne Transformation every day. I may be biased, but I believe we have the best Independent Consultants in the world. We have such talent that we have chosen to showcase them and their personal stories of transformation on the following pages.

Our incredible Independent Consultants are only matched by our superior botanically based products, free of harmful ingredients, and formulated to be highly effective. To that end, I am particularly proud of our Scientific Advisory Board, featured on this page, for the standards they are helping us set to formulate new products, and clinically test them for safety and efficacy.

We remain committed to protecting the environment, something our founder Petter Mørck started 34 years ago — well ahead of his time. We constantly strive to reduce packaging, and over 90% of our personal care packaging is recyclable. We are also proud of our UPS carbon neutral shipment benefit.

Over the last two years, we have established the Arbonne Charitable Foundation with our Independent Consultant Leaders. The Foundation has a mission to develop teen girls' and boys' self-esteem. Through the generosity of our Independent Consultants, our employees, our suppliers and our company, we have raised over \$1 million. Nearly 200 grants have been distributed to deserving nonprofit concerns in which our Independent Consultants and employees have been involved, to help teens realize a better future.

I hope you share my enthusiasm for the incredible Arbonne Community and our pure, safe and beneficial products — it is what motivates my amazing employees and me to make life better each and every day for our Independent Consultants and Preferred Clients.

I also hope you enjoy reading our catalogue as much as we enjoyed creating it. Welcome to our incredible Arbonne Community, and begin your transformation!

# Arbonne Ingredient Policy

Transparency and honesty. They are the hallmarks of our product integrity. At Arbonne we are continuously improving and evaluating our ingredient policy so we can develop the most thoughtfully designed, innovative, safest products. And we're always striving to do better. Each and every single day.

We're working diligently to understand the latest science — consulting our Scientific Advisory Board, conducting safety tests, and adapting to new standards. Each product is developed with meaningful botanically based ingredients, chosen for effectiveness and safety. We find the perfect balance of what is pure with what is efficacious.

# Safe '

Our products are safe, nontoxic, and committed to being eco-friendly. We're vigilant about the newest research regarding chemicals to ensure we're being mindful and cautious. We proactively search for the purest, most unadulterated ingredients from all natural sources.

# Beneficial 🎇

Our core commitment is to provide effective products that deliver a true benefit. Products everyone should have and will desire. As trailblazers, we must educate, empower and inspire people to make better choices for the beauty, health and wellness of their families and friends.
